

A single box
for an entire world
of Iridium[®] voice, data
and safety services

ST 4300

ST 4300

Voice, narrowband data, FANS and ACARS

Takes everything Iridium® can do and lets you decide exactly what you want it to do.

ABOUT ST 4300

Flexible, affordable, compact, and scalable, the ST 4300 combines voice and data functionalities into a single box, allowing you to configure cabin and flight deck connectivity based on your own needs and budget. Select 1, 2, or 3 voice channels to make and receive calls anywhere in the world.

Install it as a standalone system or integrate it with Gogo Biz® or SwiftBroadband systems for broadband Internet capabilities. It's all possible with this modern platform designed for Iridium service now and in the future.

MULTI-CHANNEL WORLDWIDE SATCOM SYSTEM

- Available with 1, 2, or 3 Iridium voice/narrowband data channels. Includes one dedicated Iridium data channel
- Eligible for FANS Over Iridium (FOI) certification and ACARS
- 802.11b/g/n Wireless Access Point
- Optional Internet connectivity by adding Gogo Biz for coverage in the U.S. and portions of Alaska and Canada, or by adding SwiftBroadband for global coverage
- Full PBX (up to 100 extensions)
- Simplified aircraft installation and integration
- DO160G and DO-178 Level D approved
- Fax service available
- Service available on-the-ground and in-the-air
