

AIRSHOW® MOVING MAPS

CLEAR VIEWS AND ACCURATE INFORMATION

Engage and entertain passengers of all ages

After 40 years of evolution, Collins Aerospace Airshow® moving maps bring air travel to the next level. With crisp images and a modern interface, Airshow will be your passengers' favorite cabin feature.

Children and adults of every age are fascinated by the spectacular views of the world as they fly. Our Airshow moving maps offer an exciting level of visual realism with interesting geographical facts. With its rich array of features and high-performance capabilities, Airshow represents the best of business aviation's most popular moving map systems.

ARE WE THERE YET?

That classic traveling question was the original motivation behind our first Airshow moving maps system. Since its introduction, we have continued to build on our experience and expertise to keep our systems at the forefront of information delivery capabilities, while making every flight more enjoyable. Collins Airshow will turn "Are we there yet?" into "We're here already?"

KEY FEATURES AND BENEFITS

- Intuitive system design
- Up-to-date weather/data feeds
- Mobile application available
- Modern user-friendly interface
- Interactive entertainment for all ages
- Easily integrates with Venue™ cabin management system

An engaging world awaits

See where you are, learn about where you're going and know when you'll get there. With Airshow, passengers stay informed and entertained with visually appealing interfaces and accurate to-the-minute flight data on every flight.

- **Point-of-interest panel** – high definition images with captions and interesting information on various points along the flight route
- **Flight progression map** – various progression views, including preflight route, total route map and distance traveled
- **Flight information page** – flight information parameters based on real-time data from the flight navigation system
- **Relative location indicator** – the distance to cities or points of interest, relative to your aircraft's position
- **Map styles** – state-of-the-art photo imagery with unprecedented color and realism consequent.
