

Gogo MIX

Easily manage your Wi-Fi experience and create custom networks.

Gogo MIX, an application within Gogo DASH, provides you with more control over your inflight Wi-Fi experience – at no additional cost. Proactively create and manage your network configurations, view status reports and network history, and assign priority access to mission-critical personnel on your aircraft.

FEATURES

Set up Wi-Fi user groups

Create different Wi-Fi networks to customize access for VIPs, passengers, and crew

Customize the inflight experience

Prioritize connectivity preferences for speed, capabilities, and cost control

Manage configurations remotely

View and edit connectivity configurations, including status and history, for one or multiple aircraft

REQUIREMENTS

Gogo MIX is available and free to current Gogo Business Aviation customers, using at least one of the following products running AVANCE software version 4.1 or later:

- Gogo AVANCE L5/L3
- Gogo AVANCE SCS Elite/SCS Media

ACCESS MIX IN DASH

To access MIX, you will need a DASH login and provisional access to the MIX app. If you are a DASH Administrator for your organization, you will automatically receive access. DASH is Gogo's self-service toolkit where you can manage virtually all aspects of your Gogo experience. If you haven't already, you can request DASH access at business.gogoair.com/dash
