

GOGO 5G

More speed, more bandwidth, more live experiences – this is the air-to-ground (ATG) inflight connectivity and entertainment (IFEC) experience that allows you to do it all.

Advanced. Impressive. Powerful.

Discover the next-generation air-to-ground (ATG) network, delivering speeds of up to 80 Mbps. Seamlessly stream, connect in real-time, elevate your inflight productivity and more.

Access this experience through AVANCE LX5, the premier AVANCE system to date. With the same form factor as the AVANCE L5 an upgrade to 5G is straightforward with a simple box swap and MB13 antenna installation.

What does it take to be 100% end-to-end 5G?

- Airborne equipment will have 5G chipset
- Ground base radios at each base station are 5G
- Data center servers are all 5G core services
- Meets or exceeds 3GPP standards

Gogo AVANCE LX5
