

WHY FLIGHT DEPARTMENTS CHOOSE GOGO

FLIGHT DEPARTMENTS COUNT ON GOGO

for secure, reliable, high-performance connectivity and unmatched support, so you can keep your teams connected, your operations running smoothly and your missions a success.

WHY FLIGHT DEPARTMENTS CHOOSE GOGO:

RELIABLE CONNECTIVITY

Uninterrupted global connectivity with seamless network switching, delivering resilient performance and reliable coverage across oceans, remote regions, congested airspace, and other challenging flight environments.

PERFORMANCE YOU CAN COUNT ON

Built for today's connected cabin, Gogo delivers low-latency, high-speed internet that supports video conferencing, streaming, cloud applications, and multiple connected devices with confidence.

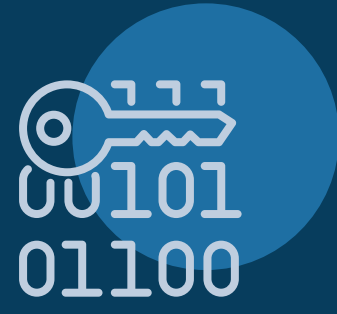

EXPERT SUPPORT WHEN YOU NEED IT

24/7/365 global support from aviation experts and field service engineers that can be onsite at your hangar anywhere in the world within 24 hours.

BETTER PLANNING. GREATER FINANCIAL CONFIDENCE.

With 3-year price protection and flexible hardware financing, flight departments can deploy industry-leading IFC today while keeping costs predictable and budget-friendly.

PRIVACY BY DESIGN

Systems collect the bare minimum needed for performance, keeping your location, flight activity and cabin metadata private instead of quietly logging or monetizing it.

MORE THAN CONNECTIVITY: A TRUE OPERATIONAL PARTNER

From installation to everyday operations, Gogo is with you every step of the way. Our **aeroIT® training** equips flight departments with the knowledge to confidently manage onboard connectivity, while dedicated **Entry Into Service (EIS)** support helps ensure a smooth deployment and seamless adoption for crews, passengers, and IT teams.
