SkyTicket®

Control, customize, & monetize your connectivity

A secure and easy-to-deploy platform that lets you offer voucher or credit card payment services through your own customized portal. Designed for charter and fleet operators around the world, SkyTicket provides fully flexible and hassle-free control of your connectivity. Putting you in complete control, manage access and pricing for each mission directly - even while in the air.

TAILORED SELF-SERVICE INFLIGHT CONNECTIVITY

SkyTicket lets you tailor connectivity services to specific needs. Passengers can create a login prior to or during a flight, select the connectivity service package that's right for them, then use any major credit or debit card to complete their purchase.

WE'VE GOT YOU COVERED

With you every step of the journey
Gogo offers on-site training and support to ensure the best user experience of your SkyTicket solution. Our specialists will help you configure your router and dashboard, and manage the financial setup with Global Reach, so you can quickly start to control transactions and generate revenue for your business.

Hassle-free updates
SkyTicket is hosted in our secure SD Data Center, there are no uploads to on-aircraft storage and any updates to your portal are nearly instant - for maximum performance and minimum downtime.

Backed by the best in the industry
Our customer support continues well beyond delivery. We offer first-level support and troubleshooting 24/7/365, with a single point of contact for speedy resolution and complete peace of mind.

The Gogo advantage
SkyTicket is currently available on all SDR/SDRG equipped aircraft, with enablement on AVANCE systems to follow. With all Gogo systems you also have access to our global ecosystem of powerful software, hardware, terrestrial infrastructure, cybersecurity solutions and award-winning customer support.

REQUIREMENTS

- Currently available on all SDR/SDRG equipped aircraft, coming soon to AVANCE
