

CONNECTIVITY FOR PILOTS

Why inflight connectivity matters in the cockpit

Connectivity for pilots

Connectivity in the cockpit allows you to leave the ground without losing your connection to everything on the ground. That means that whatever you or your passengers need, whatever you're facing — weather, catering, a ride, a medical issue, a diversion — you're never out of reach of your team.

Real time information to make better flight decisions

SAFETY

“ *It's so much more efficient having the info at your fingertips with ForeFlight, Expect Departure Clearance Time (EDCT), and various flight planning and scheduling apps. We can't imagine flying without inflight Wi-Fi now.”*

RYAN JOHNSON, Pilot of Falcon 900EX

5 Reasons why inflight connectivity matters to pilots

1

Inflight Wi-Fi enhances pilots' key capabilities and applications, like weather, navigation, and flight planning.

2

Wi-Fi enables pilots to stay in constant touch with dispatch, maintenance, passengers, and many others.

3

Wi-Fi can be life-changing in urgent situations.

4

Inflight Wi-Fi keeps passengers happy and productive, both domestically and overseas, which means pilots are happy as well.

5

Inflight Wi-Fi adds value as a true return on investment (ROI).

A Citation XLS+ private jet is shown in flight, banking to the right. The aircraft is white with dark stripes along the fuselage. The tail features the registration N560N and the text "CITATION XLS+". The background is a dark, blue-tinted image of a forested landscape.

Real-world scenarios

“As a pilot, I frequently use the Wi-Fi to check for weather ahead, as well as contacting passengers and FBOs at our destination to give them updates on our status. It is a very powerful business tool. We’ve had countless passengers use it for their work enroute to increase their productivity.”

JONATHAN HARTNESS, Pilot of
HondaJet

“Flying out of Kalamazoo, Michigan, Gogo inflight connectivity helped us. The pilots notified us via Wi-Fi of a bird strike. We put the wheels in motion to get another plane and maintenance en route.”

BRAD ONGNA, Senior Manager of
Maintenance and Ground Operations
Stryker

“We have 19 aircraft in our fleet right now and they consist of Pilatus’, Citation CJ2’s, Excels, and G200’s. All of our jets have Gogo Wi-Fi. We’ve been completely happy with Gogo.”

COREY BENGTZEN, Founder and CEO
of SkyShare

“ Whether flight planning, maintenance issues, or weather, Gogo inflight connectivity has saved the day in numerous times.”

JASON TALLEY, CEO & Pilot

A pilot's perspective

Watch this video of how inflight connectivity is essential and 100% worth it.
