

# Gogo DASH

Manage and control your connectivity experience

connect@gogoair.com  
+1 303.301.3271

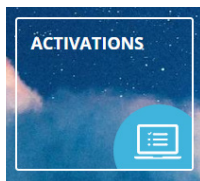

Gogo DASH is a powerful, app-based toolkit that gives your aviation operation the ability to view, control, manage and customize your Gogo connectivity experience: any time, any where, for your entire fleet or a single aircraft.

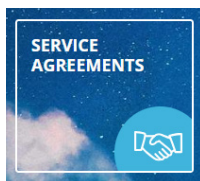

## Modules and Capabilities

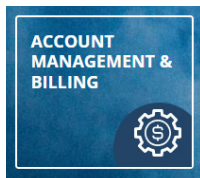

**Connectivity Insights.** See what's happening with Gogo systems and networks including flight activity, performance , data passed, and connected devices.

**Activations.** Initiate your aircraft connectivity, set up services for testing and identify the installed hardware.

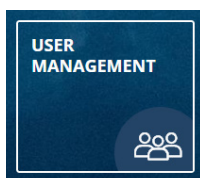

**Service Agreements.** Tailor your connectivity and entertainment services by selecting data plans and options to best fit your mission.

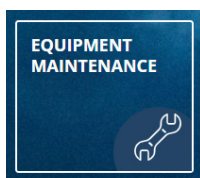

**Account and Billing.** Access billing information, see what services are on your aircraft, and how much usage is being billed.

**Gogo MIX.** Customize your inflight experience by setting up unique Wi-Fi networks, user groups and managing preferences.

**User Management.** Assign access to DASH based on your team members' roles and permissions.

**Equipment Maintenance.** Remotely update your AVANCE software, to ensure your system is optimized and future ready.

## Gogo DASH mobile app

The Gogo DASH app enables inflight personnel to quickly check the health status and availability of all Gogo services and systems on board. Through the insight and tools provided through the app, your airborne team can better communicate with support teams on the ground to troubleshoot issues should they occur.

### AVANCE over-the-air (OTA) allows you to:

- Perform remote software updates, keeping your AVANCE system up to date
- Remotely set connectivity configurations from your desk or phone
- Proactive troubleshooting to ensure your system is performing optimally
- Automatically update new Vision content, such as movies, TV shows, eMagazines, and more

## Gogo MIX

### Easily manage your Wi-Fi experience and create custom networks.

Gogo MIX, an application within Gogo DASH, provides you with more control over your inflight Wi-Fi experience – at no additional cost. Proactively create and manage your network configurations, view status reports and network history, and assign priority access to mission-critical personnel on your aircraft.

#### Features:

##### Set up Wi-Fi user groups

- Create different Wi-Fi networks to customize access for VIPs, passengers, and crew

##### Customize the inflight experience

- Prioritize connectivity preferences for speed, capabilities, and cost control

##### Manage configurations remotely

- View and edit connectivity configurations, including status and history, for one or multiple aircraft

## Availability

Gogo DASH is available for all aircraft connected via an AVANCE LRU. Gogo MIX is available and free to current Gogo AVANCE customers running AVANCE software version 4.1 or later.

## Accessibility

Gogo DASH is accessible via desktop and mobile device, on the ground and in the air. Gogo customers can sign up for Gogo DASH today by visiting [gogoair.com/getdash](https://gogoair.com/getdash) or contacting Gogo customer support (see below). Download the DASH mobile app by visiting the Apple App Store or the Google Play Store. Gogo MIX is accessible using your Gogo DASH login.

## Requirements

Gogo DASH is available to Gogo Business Aviation AVANCE customers, using at least one of the following products:

- Gogo AVANCE LX5/L5/L3
- Gogo AVANCE SCS Elite/SCS Media
